

# THE RISKS OF FEEDING BOTTLES & PACIFIERS

Your baby may refuse breastfeeding once become accustomed to pacifiers. they

Reduces the amount of your breastmilk due to less suckling.

Reduces physical contact and bond between you and your child.

Increases the risk of crooked teeth among your baby.

Increases the risk of infection, if not cleaned perfectly.

Increases costs of equipment and for sterilizing.

**Use a cup and spoon to feed your babies if you cannot breastfeed directly!**
